Project Report: Flu++ Group

Sibert Aerts, Cédric De Haes,
Jonathan Van der Cruysse, Lynn Van Hauwe

June 2017

Preface

This document is a retrospective report for our bachelor's degree group project:
a fork of the *Stride* disease modeling simulator. [1] We will give an overview
of the features we added, and describe the hurdles and obstacles we ran into
while implementing each of them.

Contents

1   **HDF5 checkpointing**

2   **Parallellization**

3   **Synthetic population generation**

4   **Multi-region simulations**

5   **Visualization tool**
